### DETAILED ACTION

Examiner acknowledges receipt of formal drawings and amendment A filed 03/03/03.

Claims 3-8, 15 and 16 are pending.

#### *Double Patenting*

1. Claims 15 and 16 remain rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 15 and 16 of prior U.S. Patent No. 6,372,229. This is a double patenting rejection.

Applicants argue that recitation of "water soluble globular protein" changes the scope of instant claim 15 from the claim 15 of the issued patent that teaches "water soluble proteinaceous material.

2. Applicants' arguments filed 03/03/03 have been fully considered but they are not persuasive.

Globular protein such as bovine albumin is a water-soluble protein and therefore a proteinaceous material; thus the scope of water-soluble proteinaceous material has not really changed.

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Art Unit: 1615

4. Claims 3-8 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 6,372,229. Although the conflicting claims are not identical, they are not patentably distinct from each other because the composition of instant claim 15 is the same as the composition in issued claim 1 except that issued claim 1 treats or coats endoluminal surface while in the instant claim 15, the composition is used to inhibit restenosis; in both cases the composition is applied to the site of injury. Instant claims 15 and 3-8 are encompassed in issued claims 1-6.

No claim is allowed.

5. Applicants' amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
